

Year 3 Summer Holiday Challenge!

Welcome to Year 3! We hope that you are as excited as we are to begin your learning with us.

The author of our first novel will be...

ROALD DAHL

Roald Dahl has written lots and lots of exciting books for children so we wondered if you could find out a bit more about him. We would like you to create a poster with all of the information you find out about him. Where was he from? What books has he written? Have you read any of his books already? As many interesting facts as you can!

Then, we would like to know more about *your* favourite book. This can be any story you have ever read. You could take a photo of you reading it (it can be anywhere you like), you could design a new front cover for it or you might want to write a little bit to tell us what it is about and why you love it so much.

We can't wait to see where reading takes you!

WSFL

Managing Relationships

Coping with life

We know that sometimes you can feel worried about changes that happen.

Decorate the person below to look like you. Can you write all the things that you are *worried* about on the outside and all the things that make you *happy* on the inside?

Another task to keep you busy would be to try to learn your 5 times tables fluently! You could even practise your 10s and 2s too!

Key Instant Recall Facts

Year 2 – Summer 2

I know the multiplication and division facts for the 5 times table.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

$5 \times 1 = 5$	$5 \div 5 = 1$
$5 \times 2 = 10$	$10 \div 5 = 2$
$5 \times 3 = 15$	$15 \div 5 = 3$
$5 \times 4 = 20$	$20 \div 5 = 4$
$5 \times 5 = 25$	$25 \div 5 = 5$
$5 \times 6 = 30$	$30 \div 5 = 6$
$5 \times 7 = 35$	$35 \div 5 = 7$
$5 \times 8 = 40$	$40 \div 5 = 8$
$5 \times 9 = 45$	$45 \div 5 = 9$
$5 \times 10 = 50$	$50 \div 5 = 10$
$5 \times 11 = 55$	$55 \div 5 = 11$
$5 \times 12 = 60$	$60 \div 5 = 12$

Key Vocabulary

What is 5 **multiplied by** 7?

What is 5 **times** 9?

What is 60 **divided by** 5?

They should be able to answer these questions in any order, including missing number questions e.g. $5 \times \bigcirc = 40$ or $\bigcirc \div 5 = 9$.

Top Tips

The secret to success is practising **little and often**. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day. If you would like more ideas, please speak to your child's teacher.

Songs and Chants – You can buy Times Tables CDs or find multiplication songs and chants online. If your child creates their own song, this can make the times tables even more memorable.

Spot patterns – What patterns can your child spot in the 5 times table? Are there any similarities with the 10 times table?

Test the Parent – Your child can make up their own tricky division questions for you e.g. *What is 45 divided by 5?* They need to be able to multiply to create these questions.

Use memory tricks – For those hard-to-remember facts, www.multiplication.com has some strange picture stories to help children remember.

Have a wonderful summer and we look forward to seeing you in September,
Mr Dunderdale, Miss Patterson and Miss Kitching
