

Year 5 Friday 26th February Handwriting practice

Each week we would like you to do a short piece of writing that links to the following weeks learning and shows your handwriting and presentation skills. Write this out in your neatest handwriting.

This week is algorithms in line with our learning in computing.

An algorithm is a sequence of instructions or a step-by-step guide that are followed to solve a problem or complete a task.

Here are the instructions for making a smoothie:

1. Add fruit to the blender.
2. Add milk to the blender.
3. Put the lid on the blender.
4. Switch the blender on.

Imagine if we missed out one of the steps or reversed the order. We could end up switching on the blender with nothing in it. Or there could just be milk in the blender and no fruit.

That wouldn't make a very tasty smoothie, would it?
In fact, it wouldn't make a smoothie at all!
