

# Homework Menu - Year 3

Can you create a fact file all about Earthquakes? Including what we have learnt so far and anything you have researched further.

Can you come up with your own spell? Think about the powers your spell will behold and what will happen when your spell is used.

Our aim is for everyone to be fluent with their times tables so would love you to practice your 2's, 5's and 10's this half term! You could also try to earn certificates on Mathletics and TTRS!

For PE this half term you are looking at athletics; we would like you to research an athlete on your choice and create an information text all about your chosen athlete.

You can choose any piece of homework from the homework menu above - a piece of homework is to be handed in on a Friday (there are 4 tasks one for each week left of the half term) and these can be done in any order.
